

VOL. III - THE SPHERE

LOOK BOOK

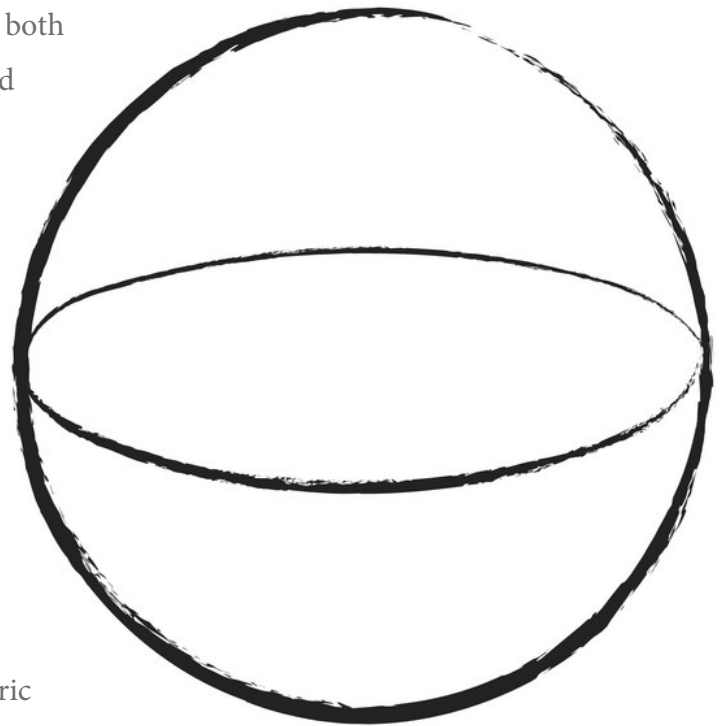

LUXURIOUS HOSPITALITY LIGHTING FOR GUESTROOMS AND PUBLIC AREAS

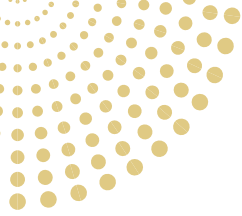

VOLUME III - THE
SPHERE

In this Look Book we are interested in the geometry of the sphere. One of the most basic geometric forms, but one of the most valuable. The curves on the sphere compliment both organic and non organic forms. A globe can be supported or can itself support strong lines, flowing curves or almost any design element. Although if not applied by a craftsman, the design can be off balance and seem unnatural. It takes a skilled eyed of a professional to be able to balance the geometric form and achieve balance. Not only the balance of shape and form but also of light and material.

Throughout this booklet is a collection of various styles of the sphere and how Scott Lamp Company has incorporated the invaluable geometric form into our luminaries. This booklet is a brief overview of the capabilities that Scott Lamp has to offer. To view our full and current catalog, please visit ScottLamp.com.

“There is geometry in the humming of the strings, there is music in the spacing of the spheres.”
